

Pole de Stabilité

A general assessment of the livestock chain in Kapisa Province, and Surobi district in order to inform on the most appropriate interventions for the implementation of a new livestock project.

Donor / contractor	French Embassy
Budget	€ 30,000
Period	December 2012 – Mid February 2013
Area	Kapisa Province and Surobi District of Kabul Province

The overall goal was to provide a detailed analyses of the livestock and poultry sector in this area and give solid recommendations for the implementation of a new livestock project.

To this aim a survey has been performed under randomly selected key informants, 150 in Kapisa Province and 40 in Surobi district. Data are collected on knowledge of farmers, livestock numbers and movement, seasonal factors, markets and traders, supply chains and linkages between different actors.

The survey has resulted in an overview of the livestock chain in the targeted area and in recommendations for future interventions.
